About Haystack Dryers

Haystack Dryers are the world's leading manufacturer of people dryers. We introduced innovative drying to the public in 2000 and have been growing our customer base and product range ever since. Based in the UK with an office in the US and global teams of engineers, we supply many of the world's leisure attractions. Our award winning dryers create an enjoyable, hassle free drying experience that your guests will find unforgettable.

What is a Body Dryer?

A body dryer is specially designed machine that warms and dries you after a water based activity or prior to getting changed.. The dryers heat you with infrared lamps and circulate warm, clean air around you, creating a vortex. Each cycle last around 3 ½ minutes and you emerge feeling warm, dry and energised.

Applications and Uses

Our dryers can be seen at many of the world's largest **theme parks**, **water parks**, **spa's**, **FEC's**, **medical facilities**, **resorts & leisure centres**.

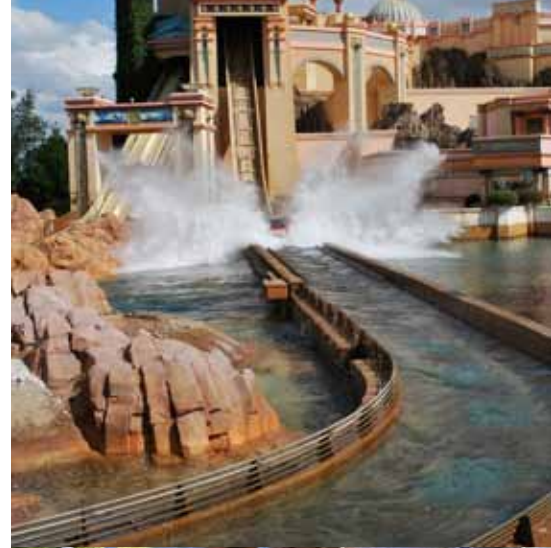

Common uses for body dryers include:

- For drying guests after water rides or flumes
- In changing rooms
- After spa treatments
- Beside splash play areas
- Within indoor attractions with water play areas
- To assist the drying of people with limited movement
- After bathing in private residencies

Benefits of People Dryers

The dryers have a surprising number of benefits to both the operator and the visitor including:

- Adding a new incremental source of revenue
- Keeping guests longer at the attraction
- Keeping rides open in the colder months
- Creating a new, fun attraction
- Reducing litter and mess from ponchos and towels
- Increasing spend in other areas of the park
- Reduce your carbon footprint
- Increase family ridership
- Decrease pressure on bathroom facilities
- Reduce time and congestion in changing areas

Talk to us about your requirements

Our knowledgeable and friendly team can talk you through:

- Flexible commercial terms: purchase, hire or joint venture options
- Selecting the right dryer for your guests needs
- Theming and brand awareness
- A range of vending and operating types to suit your attraction
- Environmental and financial benefits
- Technical requirements

Environmental

Drying in our purpose built drying units provides an environmentally friendly drying experience. No more high laundry bills from wet towels or having to pick up discarded ponchos. The dryers use unique 'reclaim technology' that allows the unit to recycle up to 80% of the heated, clean air it expels, reducing energy consumption and increasing the efficiency of the unit.

The dryer draws past its sterilised UV filter chamber before expelling the warm air again to create a vortex – a fun and unique experience in itself.

Vending Options

The dryers can be operated in a number of ways depending on your type of attraction and your customers.

Some of our vending options include:

- Cash (coins or notes)
- Debit/credit card
- Stored value cards
- 'Freeplay' buttons
- RFID tags and bracelets

Some of our many global customers:

Cyclone Dryers

For Drying on the go with family and friends!

Our most popular product, the Cyclone Dryers can often be found at the end of a water ride with a queue of people waiting to use them! With its unique, robust design the cyclone dryer can operate outside in the most extreme of temperatures and will be a valuable addition to your customer experience.

The dryers are a reliable way to generate incremental revenue at:

- Log flumes
- River rapids
- Splash battle
- Super splash rides
- Water coasters
- Water splash play areas

Cyclone dryers can dry up to 5 people at a time and keeps families and groups of friends warm, dry and comfortable after their water ride experience.

Hurricane Dryers

For a personal, indoor drying experience!

Hurricane dryers are now a common sight in changing rooms around the world. With their space saving size and eye catching design they are suited to a wide variety of indoor venues, whilst still being able to dry the whole family at once!

Hurricane dryers are suited to many environments including:

- Swimming pools
- Water parks
- Leisure centres
- Spas and saunas
- Resorts

Hurricane dryers are an excellent way to increase changing room throughput, reduce mess from water and towels and add a new revenue stream to your operation.

Breeze Dryers

A more intimate, individual drying experience

Breeze dryers are the smallest and most versatile of our dryers. Small enough to mount on a wall or suspend from a ceiling, the Breeze Dryer is the latest must have addition to your changing room or bathroom.

These dryers are adaptable to almost any location including:

- Treatment rooms
- Private bathrooms
- Changing rooms
- Cubicles
- Health clubs

The Breeze dryer gives an individual drying experience like no other. This can replace a harsh towel dry post-treatment in a spa or a luxury addition to a health club changing area.
