

SWISS MANUFACTURED TECHNOLOGY FOR THE AERIAL ADVENTURE INDUSTRY

— SWISS MANUFACTURED TECHNOLOGY FOR THE AERIAL ADVENTURE INDUSTRY —

**“Safely leading the
industry to new heights
for over a decade”**

**KANOPEO**

In Switzerland, it's not all about chocolate.

Design, engineering & precise manufacturing are essential.

Kanopeo leads the industry to new heights by safely harnessing the power of Swiss continuous belay technology for the aerial adventure industry.

We are pleased to showcase our latest technology that helps you attract new customers and bring new energy to your facilities. We look forward to creating your custom aerial adventure together.

Safely leading the industry to new heights for over a decade

Safely leading the industry to new heights for over a decade

The Evolution of the Revolution

In 2006, Jacques Christinet and his longtime friend Vincent Hueber opened a high ropes adventure course in Zermatt, Switzerland.

At the time, they were limited to the traditional carabiner system. Customers had to loosen the carabiner, clip and unclip on the safety cables at junctions and between elements. Jacques and Vincent quickly recognized this was a safety concern as the system left users vulnerable for a few short seconds.

In 2007, the two passionate mountaineers successfully designed and engineered an innovative system that would continuously secure the individual to the safety cable. Speedrunner I[®], the world's first rolling continuous belay system, was introduced. Speedrunner I[®] drastically increased user safety and customer throughput by up to 25%.

They retrofitted Forest Fun Park Zermatt with the revolutionary system, premiering the first aerial adventure park completely equipped with a rolling continuous belay system in the spring of 2009.

Safety leading the industry to new heights for over a decade

In 2010, Vincent Hueber and Jacques Christinet opened Kanopeo GmbH, updating the Speedrunner I[®] and re-introducing it as Saferoller[®]. The innovative rolling continuous belay system immediately caught the attention of a number of aerial adventure park owner/operators who enthusiastically embraced the technologically superior system.

In their ongoing quest to serve the market, they introduced the Speedrunner[®] product line in 2012. Vincent conceived the Kanhook (mobile connecting device) which set the bar for economical continuous belay systems.

Kanopeo's HQ is located in the center of Basel Switzerland.

Saferoller® is the world's first rolling continuous belay system

Saferoller® is the only system designed for installation with safety line out-of-reach for maximum adrenaline rush.

The Saferoller® Trolley is a certified mobile connecting device (PPE) conforming to all industry safety standards. Once connected to the safety line, it is impossible to disconnect without the express assistance of an operator. Your safety is assured. From 4 years and up, just slip on and roll. Ideal for Saferoller® Kids Trail and Zip Line Parcours of any length.

Designed to resist wear and tear. Rugged, durable and dependable.

TÜV Süd Certified, CATEGORY "E" according to EN 15567-1, EN 15567-2, EN 795 B, EN 12278, RfU CNB/P/11.104, ACCT Standards (USA)

Speedrunner[®] is the free-running solution for your aerial adventure

With the safety line at half height, it can be installed in a variety of configurations.

The certified mobile connecting device (PPE) Kanhook is a hook-based system featuring the industry-first self-closing gap mechanism. The Speedrunner[®] system can be quickly adapted for many situations. It is our most economical and easy to install system. Designed to resist wear and tear. Rugged, durable and dependable. Just hook and go.

TÜV Süd Certified, CATEGORY "E" according to EN 15567-1, EN 15567-2, EN 795 B, EN 12278, RfU CNB/P/11.104, ACCT Standards (USA)

Engineered for Safety – Built for Life

Our manufacturing philosophy is to design the safest, simplest and most durable components possible.

We work with our partners to monitor and evaluate systems in real time and provide solutions and product enhancements as required. This constant feedback ensures that safety, simplicity and durability are continually monitored.

Our systems meet the rigorous demands of operators worldwide. They are specifically designed to increase user throughput rates as much as 25% and decrease take off points, maintenance costs & operating costs. We are the most powerful engine. **Safe - Simple – Strong**

Experience a safe, adrenaline-filled, carefree adventure in the sky

– Maximize your adrenaline rush.

Zip into your own fear while coasting on a 250m zipline. Climb like a monkey the trees on tree top walks at any height. Take a quick and thrilling 10m jump from our main tower into the Jungle.

From Team Building to your individual challenge, Saferoller® and Speedrunner® continuous belay systems are your #1 choice. From ages 3-4 up, we are the most powerful engine.

Safe – Adrenaline-filled – Carefree

We provide safe adrenaline pleasures in nature

Kanopeo is your one-stop solution when designing and building your ultimate aerial adventure park.

Thorough analysis of existing structures and environment result in the efficient design and construction of Indoor/Outdoor attractions and operations.

Forest Fun Park in Zermatt, Switzerland, continues to serve as the testing ground for product innovation. Transferring this aerial adventure park management experience to the owner and builder is an essential component of our business model.

We continue to enhance and develop leading edge continuous belay systems at this site. Service is our Priority. **From Advice to Zip**

Create your tailor-made design with Kanopeo's experienced team

We work in close consultation with park owners and builders to design, construct and operate your optimal adrenaline adventure.

Harness the power of Swiss technology with the Saferoller® & Speedrunner® continuous belay systems. Installed in over 700 trails in 450 adventure parks spanning 56 countries across 5 continents.

Service is our Priority. **Let the adventure begin:**

Conquer your fears with the world's highest ropes course challenge

The Gravityz, Georgetown, Penang, Malaysia

Malaysia, witnessed the grand opening of the world's highest aerial adventure in a city centre. Opening in February, 2018, the 1 million USD outdoor adventure platform features a Flying Fox Zip Line and a challenge course with six obstacles, including a Confident Path, A Great Bridge, Z-Wire, G-Rocky, High Bench and X-Point.

Enter the world of the Royal Guard and the Pirates

Voiles en Voiles, Old Port, Montreal, Canada

Climb aboard life-size replicas of a royal and a pirate ship from the 18th century over 100 feet long. Hang on to one of the aerial adventure courses ranging from 2 feet to 35 feet high, or run through the inflatable playground.

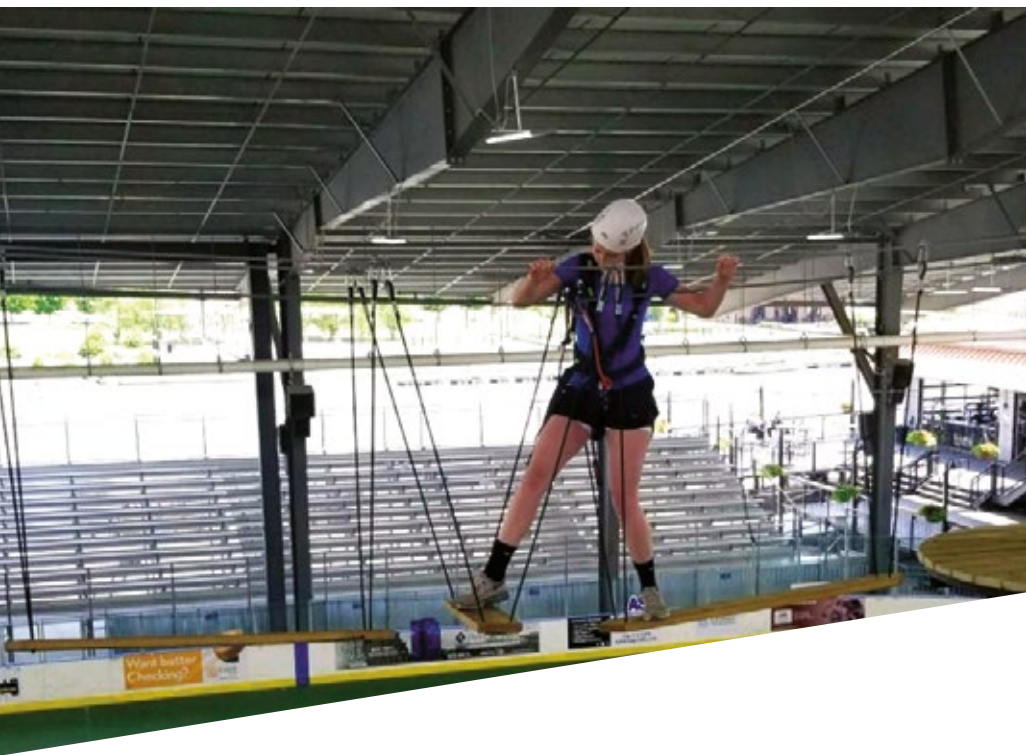

Challenge yourself on the Cairns ZOOM Indoor Ropes Course

Cairns Zoom & Wildlife Dome, Cairns Australia

The Hi-ZOOM provides a greater level of difficulty for more adventurous visitors. It consists of more complex crossings and 3 ziplines – one of which takes you directly over Goliath, the crocodile! The course winds its way up through the Dome, with some elements nearly 12m above ground level. You'll meet lots of our birds as you make your way through the course – it's a fantastic way to get up close with parrots and other species.

The Mid-ZOOM course offers an easier level of difficulty and is suitable for familiarization and initial training of equipment and heights before you head up onto the more challenging activities. It's also great for younger kids! The course runs 3m above the ground and has a range of elements including climbing walls, tunnels, a cargo net and swings.

A New Way to Hang this Summer at Buffalo RiverWorks' High Ropes Course

RiverWorks, Buffalo, New York, USA

Located on the banks of the scenic Buffalo River, RiverWorks is the city's premier water-front, boating, sports, music and entertainment destination. This massive complex is a popular destination for a host of thrilling activities. The two exciting new high ropes courses have been open since June, 2018.

The Ropes Courses are under a huge pavilion-style roof above the ice rink area of River-Works, and not fully enclosed. You still get the outdoor feel with the ability to operate on rainy days. The lower course is a great introductory experience while the higher course is more challenging. With 10 elements on each course, there is plenty of adrenaline-filled adventure. Both courses are specifically designed for kids 7 years and up.

Float through the treetops during a Canopy Treetop Tour

Zilvermeer, Mol, Belgium

“According to us, it is the largest zipline in Flanders”, says director Toon Claes of the Zilvermeer: “The track is in total about one kilometer long and is up to sixteen meters high. You literally float between the treetops of our beautiful domain.”

The largest zipline trail in Flanders is a true total experience. “It is divided into three levels that increase in both height and difficulty: the obstacle course, the practice zipline course and the zipline course for advanced users on the water. With a central tower of three floors and a top of more than sixteen meters high, Zilvermeer visitors - years after the construction of the well-known fifteen meter high slide in the playground - can enjoy a higher, more breathtaking view.

The zipline route that leaves from the highest level passes twice over the boating lake and returns following a journey of no less than one kilometer through the treetops.

“More than 3.5 kilometers of steel cables were used to stretch the three routes between 30 large support poles” notes Jan De Haes (N-VA), deputy for tourism.

Boost your Kid's confidence & build their trust

Saferoller® Kids Trail: Forest Fun Park, Zermatt, Switzerland

Get your adventure business off the ground with our configurable Saferoller® Kids Trail made specifically for young kids. Children will get stronger and more flexible while building self-confidence by doing things they never thought possible.

Develop your zip line skills on the Blue Course. Test your limits on the Black Course and guarantee a thrilling, adrenaline-filled experience on the Brown Course. For children 3-4 years and up.

Enjoy Belgium's seashore aerial adventure park set on poles

De Kegel Xtrem, Middelkerke, Belgium

De Kegel X-trem Park is opened in Middlekerke, July, 2018. This seashore aerial adventure park features 4 Zip lines and 5 challenge courses with 54 obstacles. Cool features like bike on the cable and snowboard, complement nets and swings. There are varying degrees of difficulty with platform heights at 2m, 4.5m and 7.5m.

Winner of the SNEPA 2017 Product "Innovation Award"

SUMAA-Trailer: Saferoller® Ultimate Mobile Adventure Trailer

The only single-operator mobile aerial adventure on the market

Kanopeo brings portable adrenaline to any event. From a few hours to a few days or longer, the revolutionary SUMAA-Trailer has a throughput of 40 to 80 people per hour and comes in 3 sizes: 8m (26ft), 10m (32ft), 12m (40ft). Whether you are promoting your park by bringing the fun to prospective clients or starting an exciting new mobile adrenaline-based business, the SUMAA-Trailer is your #1 choice.

The structure meets all applicable European (EN 15567) and American (ACCT) standards. All courses are certified.
