RUN THE RIVER

THE ONLY DYNAMIC AND VIRTUAL
ATTRACTION WATERPROOF!

THE ONLY ONE WATERPROOF
DYNAMIC VIRTUAL & OUTDOOR
ATTRACTION IN THE WORLD!

IT'S A DREAM VR PROJECT

The first and only **Rafting simulator**, with **waterproof VR headsets**, with impressive **SFX effects** like wind and water jets, never experienced in any **water park**!

A breathtaking **360° experience** that takes the audience through beautiful and terrifying scenes.

We want the public to feel **totally immersed** when we take them in the **rafting of extreme athletes** to discover a new perspective on the world.

PITCH

The eyes look in the void, the wind is blowing, We breathe in a last long breath, the sound of the heart in full swing, the athletes prepare the descent, the waves are rising, the trees are swaying.

The film starts with a 10-second portrait gushing in time, as we experience the calm before the storm, the moment before they jump from the precipice of this descent of rapids!

We look around and see the magnificence of our position: a moment of calm before entering the raging river, a scenery of mountains and fir trees, all the beautiful places we have a second to appreciate before feeling the deafening noise adrenaline and start falling.
