

RIDE, SLIDE & GLIDE

**100%
FUN!**

PROJECTS

Swedice creates and realises innovative and technical track systems. All over the world, both temporary and permanent, 1800 m² and 50 m², with or without slope, made from ice or plastic. Everything is possible. We work on a project basis, either as a turnkey partner or for a sub-project. We will manage the entire delivery process for you, with or without managing the operation.

► ICE*AMSTERDAM

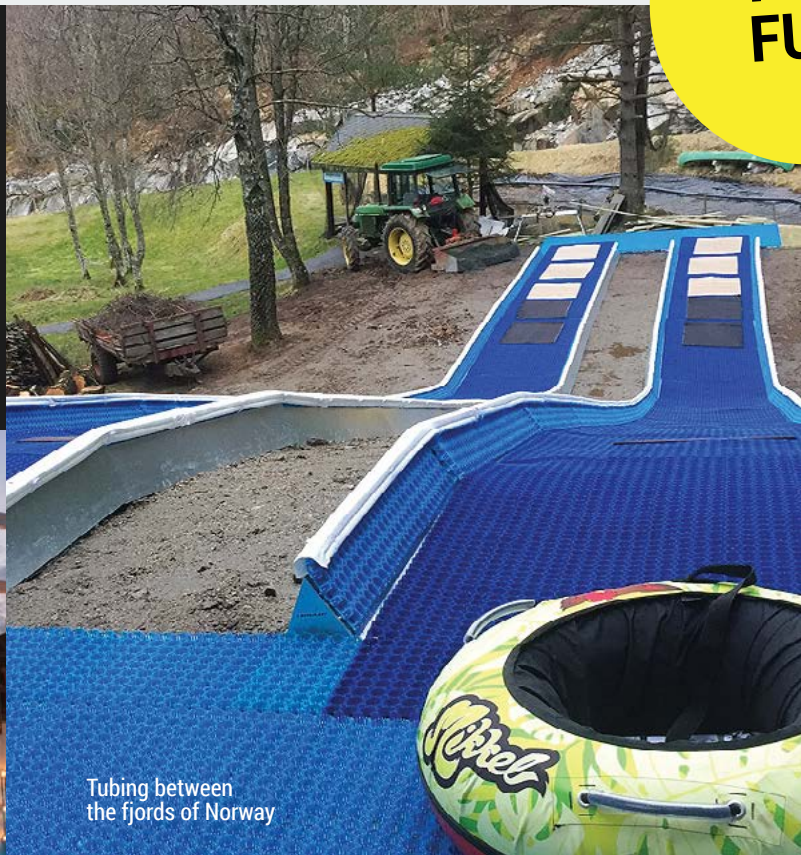

Swedice has been organising Ice*Amsterdam for the last 17 years on the Museumplein in Amsterdam with amongst others Stichting Ice*Amsterdam, and Amstel Boat House as catering partner. For 100 days we provide the visitors with an amazing ice experience, with the latest Icefloo system.

The heart of Amsterdam, the Museumplein

NO STONE WAS LEFT UNTURNED

Swedice has created and designed the track with a typical Dutch character as well as provided the engineering and applied the latest ice rink techniques. As a full-service supplier, Swedice thinks about everything. Every year we assemble the construction, take care of the operation, the maintenance of the ice rink, the sale of the tickets as well as the hiring and sharpening of the skates. The catering is in the hands of Amstel Boathouse.

Tubing between the fjords of Norway

► TUBING TRACK MIKKELPARKEN

An attraction can be quickly realised. In a beautiful fjord in Norway, at the Mikkelparken Family Park there are two customised tubing courses of 30 meters each.

These tracks were completed in just four months. From the idea, design, plans, production right up to the assembly.

ICE RINKS (also with ICEFLOO)

We realise temporary and permanent ice rinks for various events and different locations. Swedice regulates the construction, management and dissembling. Upon request, we also arrange the rental of skates and the sales of tickets. We use the innovative Icefloo system with aluminium panels for a smooth ice surface.

✓ CONCEPTION

An event or attraction is a complete experience when it connects to the overall concept. The concept and design provides the framework of the technique. That's what we call 'place making'. Whereby, Kinetic Creative is our experienced partner on the concept section. They design a clear concept, a fantastic design, and develop a theme in detail. Kinetic Creative provides the atmospheric experience, while Swedice executes it.

✓ TUBING TRACK

Slide in a SNOW TUBE of a TUBING TRACK. The gravity and low-friction Neveplast is a recipe for an amazing thrill. The matt system is durable and offers endless possibilities; short, long, straight or curved. The rinks are easy to assemble and are also the perfect for a temporary solution.

✓ MINI TUBBY (2-13 YEARS)

Loads of fun for the littlest ones. Specially designed for small spaces and is therefore ideal for entertainment in shopping centres, playgrounds and adventure parks, as well as events and parties.

✓ SNOW TUBES

The SNOW TUBES are available in different sizes for both winter and summer courses. To completely finish the look, the SNOW TUBES can be personalised.

✓ SKI NP30

Skiing and boarding on a freshly prepared slope in summer. It can be done, with the NP30 mat from Neveplast. The feeling is unrivalled. And this without adding any water, all year round, both indoors or outdoors.

✓ SKIDDY DRIFT CARTING

Experience the feeling of drifting on ice. Let your cart break free on the low-friction surface. SKIDDY offers the best of two seasons, and on top of this is available all year round.

✓ S-KID (5-15 YEARS)

Spin in a mini-cart over the slippery Neveplast surface and experience the feeling that you're riding on snow. S-KID is a challenge in the field of adaptation and estimation.

***Swedice is an exclusive dealer of Neveplast.** This Italian product is a patented low-friction sliding mat system with the same properties as snow and is implemented in various ways all around the world.

▶ ABOUT US

Swedice provides a **'Ride, Slide & Glide'** service at your event, in your theme park or city. We develop innovative, creative and technical track systems all over the world. The enjoyment of the user and a high return (ROI) for the client is paramount.

365 DAYS OF FUN

The Swedice applications provide 365 days of fun, whatever the weather or season. Whether you are looking for a skating, skiing, sliding or drifting track.

YOUR CREATIVE PARTNER

Our years of experience and accumulated technical expertise make Swedice a creative partner that offers a full-service package; from consulting and engineering through to construction and development of Ride, Slide & Glide concepts.

SAFETY

Safety is our priority. Our TUBBY EVOLUTION is TUV certified. We check if your idea can be realised into action by using a computer simulation.

OVERALL EXPERIENCE

From idea to execution: Swedice will ensure that the idea suits your park, event and visitors. Everything must be perfect; the concept, location and design. This is how Swedice creates the overall experience.

RIDE, SLIDE & GLIDE

Swedice is your creative partner for a full-service concept; from the consultation and engineering to the construction and development of the Ride, Slide & Glide.
