--	---	----------------------	--

Concept 1900 is a French amusement equipment manufacturer based in Saint-Gobain, a city in the northeast of Paris, France.

All activities like design, engineering, manufacturing, logistic take place here, within a factory of 10,000 square meters, related process such as mechanical, electrical, carpentry, sculpture, molding, decoration and painting are all implanted in this factory, thus *100% made in France*.

Our products are sold in large quantities all over the world, they could be easily found in developed and developing countries in Europe, America, Asia, North Africa.

Our Story

Concept 1900 ***is the only manufacturer company*** in the world that continues old French traditions and innovations in carousel making.

Years of crafting by technology and art, Concept 1900 never slows down its pace. Concept1900 has been providing a wide range of carousels for those owners of ***amusement parks, resorts, and large supermarkets*** all around the world.

At the same time, in response to the growing demand for customization, we also offer exclusive carousel for high-end customers, as the collaborations with luxury brands such as Louis Vuitton, BMW and Longines.

Over time, Concept 1900 builds a product chain that ***combines traditional and new technology*** to meet the needs of customers nowadays. We keep on trails and innovations on the structure of traditional carousel, coming out with the steampunk, which reproduces the artistic concept of the sci-fi master, Jules Verne.

Our Expertise

With the combination of technical research and traditional innovation, Concept 1900 is able to provide the carousel of all sizes and variable themes according to customer's requirements. Together with our partners, Concept 1900 could fulfill **a complete turnkey project**.

All our carousels are manufactured in compliance with the current standards. However we can adapt our constructions to the different requirements and standards of the destination country (ex: GOST, SCEI, TÜV, EU certification 13814, SOCOTEC control, etc.).

The carousel remains a solid investment due to its **enduring style and reliability**.

Enchanting children and adults alike, it will always be the symbol of fun and festivity.

The **average profitability of a carousel is about 2 years**, but this figure is based on the volume of visitors to the installation site and can therefore be reduced.

Product features

Real Experience

Ultimate Crafting

**Original
Creation**

Initiative Concept

Plentiful Figures

**Reliable
Performance**

Real Experience

The animal's blood, muscles, and hair are faithfully presented, traces of masterpiece of molder and sculptor.

Painting is applied on multi-layer to highlight the context and to enhance the sense of immersion.

We stick to using real materials and assembly methods to reproduce the original appearance of the theme.

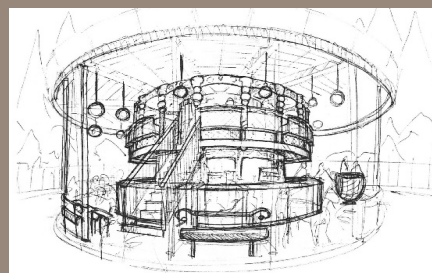

Ultimate Crafting

Craftsmanship is the core spirit of Concept 1900.

From drawing to manufacturing, from molding to coloring, every line, every contour, every light and shadow processing imply our excellence in handcrafting. In this way, each theme is endowed with a soul under craftsmans' work.

Original Creation

Never are there two identical polyester panels!

Polyester panel, the most individual part of the carousel, is written by Frédérique aged 47. With more than 30 years of painting practice, he can immediately be inspired from a sketch sent by customers. For him, every stroke is a creation, as well as a tribute paid to his favorite Jules Verne.

Plentiful Subjects

Thousands combinations for a dream travel

The riding figures are communication windows to tourists, a symbol of joy as well. After years, Concept 1900 has formed a library of hundreds standard subjects, each of which is unique outcome from the designers. Considering the change on details, there will be thousands of combinations for customers to choose.

Initiative Concept

By merging the technology and aesthetics of 19th-century steam-powered machinery, Concept 1900 has developed the series of steam-punk, in name of Jules Verne: Iron skeleton, golden grids, sparkling lights, and retro style bringing to viewers a great imagination and a most dreamlike experience.

Transparent ceiling plate combined with golden grid.

Replicas of the fictional machines in Jules Verne's Sci-fi.

Polyester panel:
Pure hand painted.

Central panel:
Pure hand painted.

Reliable Performance

The inner frame of carousel is made of galvanized steel to ensure the stability and corrosion resistance of the structure.

The top of the column is made of polyester to ensure both the good aspect and the adaption to any extreme weather.

The polyester panel is made of metal frame and FRP, and adoption of the coating in standard of automobile industry ensures the durability of its surface.

The floor is made of Sapele wood, with fine strips in western style and resistant to wear.

The aluminum torsion bar after anodizing is firm and durable, which also pays tribute to the classics in 1990s.

Our Products

After 36 years, Concept 1900 has formed its own standard product library, which allows customers to freely choose. Using existing riding themes without remaking the mold is of great advantage for both the quality and the economy, remaining No.1 choice for owners of theme parks and shopping malls!

Standard product

Classical
Steampunk
Bike'n Roll

Customization

Standard Product-Classical Style

The Concept 1900 can offer standard carousel with diameter from 4m to 15m, single, double or triple stories, with seating volume from 12 to 173. The riding subjects are free to choose in our vast database.

Family attraction - NEW

Bicycle ride

Bike'n Roll

The TÜV Sud certification ensure that the highest safety standards with passengers are respected.

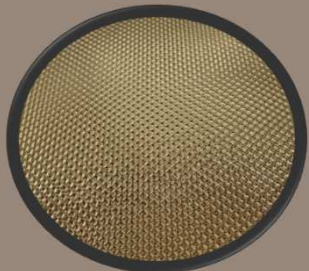

Dual braking system on the pole with emergency stop.
Dual pedalboard
Double security on safety belts
Security gates on the bicycle and all around the ride

The brave ones will enjoy the racing while other participants can relax safely and have fun participating in the adventurous riot .
(children under 5 years cannot access the bikes)

Rotation starts mechanically by the effort of the cyclist, then triggered by the centrifugal force the carousel starts the rotation.

This **interactive fun family attraction** have all what it takes to attract customers and make everyone happy being a part of the race!

Copper

Precious wood

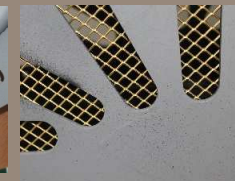

Galvanized steel

Genuine leather

Subtle blend of classic 1900 style and industrial materials, the floor is divided into two parts to allow bicycles to run on the track.
