Dark Rides

Dark Rides

Classic dark rides usually take your visitors on a passive journey through beautiful scenery. What if they could interact with that scenery? It will bring the story to life!

Next level dark ride experiences

Lagotronics Projects creates the most stunning interactive dark rides for theme parks, amusement parks and FECs. We deliver the entire package from creative concept design (theming and storytelling), game development, to managing and producing an amazing dark ride. Our expertise and advanced interactive technology takes dark ride experiences to the next level.

GameChanger

The GameChanger is a rotating interactive dark ride, offering huge capacity on a limited footprint, for a small budget. It's the perfect solution for parks or FECs with limited space, still wanting to create a true dark ride experience! The possibilities are endless, and it can be created with any theme or story you wish.

"We love to bring fun & joy to the world.
Delivering smiles to our customers and their visitors is the best reward we can get."
Mark Beumers • CEO, Lagotronics Projects
