Interactive  
Systems

# Interactive Systems

Interactivity enhances a visitor experience for sure!  
No matter what kind of leisure business you run, it's the guest experience that does the magic.

## Interactive magic

Every space or area can be turned into a great experience. From leisure facilities to rides and attractions. Interactivity gets your visitors involved with what happens next: they're playing the lead role! Our technology creates stunning interactive experiences. Not only for rides, but also for edutainment in museums or zoos, game-play in FECs, and interaction in experience centers.

## Improving ride experience

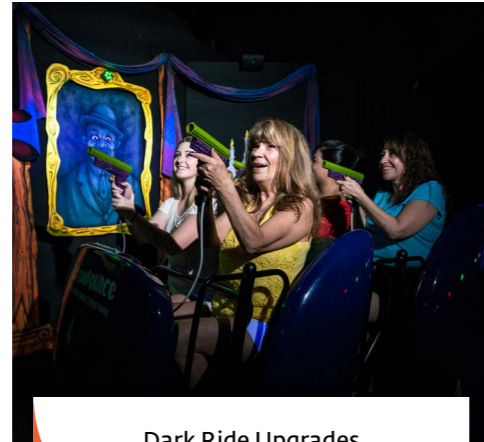

It's not always necessary to invest in new rides and attractions. Upgrading existing ones into a whole new experience is a great alternative, offering significant benefits! And most importantly: your visitors get to experience a complete new attraction. Not satisfied about downtime or maintenance costs of your existing interactive (dark) ride? Our interactive technology ensures a safer and more reliable attraction. Guests will enjoy more accurate game play, while operators will have minimal downtime and low maintenance costs!

"The many rides we've upgraded for parks all over the world, all prove that refurbishing an existing ride will turn any classic ride into a modern day hit!"  
Mark Beumers • CEO, Lagotronics Projects

## Interactive solutions:

Outdoor Ride Upgrades

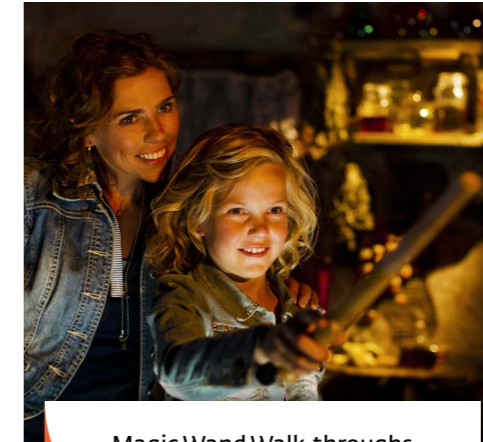

Dark Ride Upgrades

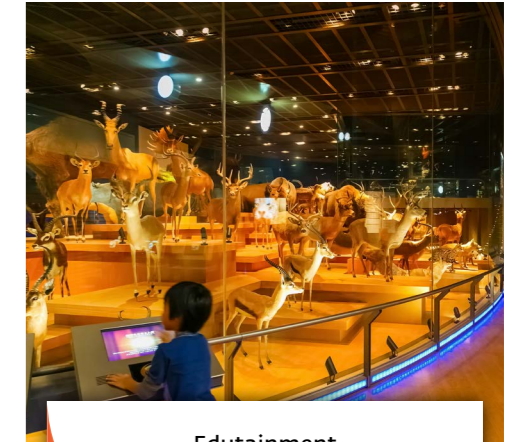

Video Game Systems

Physical Targeting Systems

Magic Wand Walk-throughs

Edutainment
